CUSTOMER PROBLEM STATEMENT:

I am	I'm trying to	But	Because	Which makes me feel
Heart diseases is said to be a big threat for the people above the age of 40. But now a day we are amongst people under the age of 40.Heart is 35-40% right. Have a high cholesterol getting coronary artery disease 40% this condition occurs when fatty substances called plaques build up inside your coronary arteries and other reasons are due to type 2 diabetes or in 50% individuals people below 40% cholesterol. Lower than 100 is diabetes or 50% heart which due to sudden cases of linkage is when in Medical field it can be treated usually using IVF. But when it comes to predicting risk for identifying and preventing a solution in the field of medicine, one must undergo several steps to research things that make use of individuals who are all at risk of these chronic problems.	Our solution is about to findout the persons who are all on the edge to caught by heart disease. For this we taking a survey on people health conditions by age, gender and what type of foods they are intaking by this we predict and visualize the people those who are all normal vs affected through data analytics.	When they facing a problem of health illness they feel lonely, get depressed of them and their family feel insecure etc. After knowing their illness can be treated, they have hope, confidence to tackle their problem and fight for they love.	The main reason of getting Cardio Vascular Diseases are diabetes, high cholesterol, blood pressure, smoking, mental depression, eating an unhealthy diet and family history of heart disease.	Cardiophobia is the main fear, Get tensed and collapsed when handling tough situations. And they want a good care from their loved ones. It is the most valuable thing for them and First of all they should have the self-belief that they'll be alright.
