Func%onal Requirements:

FR No.	Non-Func%onal Requirement	Descrip%on
NFR-1	Usability	The EHDPS predicts the likelihood of pa1ents geYng heart disease. It enables significant knowledge, eg, rela1onships between medical factors related to heart disease and paZerns, to be established.

NFR-2	Security	When it deals with(comes to)health factors,
		we should provide more security services.
		There shouldn't be no errors, lagging , base
		of data of a pa1ent profile, while working on
		the so\ware or product.

Following are the func1onal requirements of the proposed solu1on.

FR No.	Func%onal Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registra1on	Registra1on through Form. Registra1on through Gmail. Registra1on through Linked IN.
FR-2	User Confirma1on	Confirma1on via Email. Confirma1on via OTP.
FR-3	User verifica1on	Verifica1on through CAPTCHA Verifica1on through I'm not a robot.
FR-4	User Authen1ca1on	Recogni1on of correct person Resending the code in case of forgot password.
FR-5	User valida1on	Reconfirming the new password Sending a two digit number in (Google account) your Old devices, so that you can enter into a new device By entering the two digit number.
FR-6	User Submission	Submission through Google form Submission through Email.

Non-func%onal Requirements:

 $\label{proposed solution} Following are the {\tt non-func1onal}\ requirements\ of\ the\ proposed\ solu1on.$

NFR-3 Reliability	Reliability is said to be the measure of stability or consistency of test scores shown in your product. Therefore your product will normal as a good performance one in the field of accuracy.
-------------------	---

NFR-4	Performance	The performance should be fast relaying. This predic1on system should be made available in cloud to ensure beZer accessibility and seYng a milestone in providing good quality affordable healthcare.
NFR-5	Availability	The Availability of geYng used to this so\ware or
		product design is through by accessing IBM cognos Analy1cs and IBM cloud.
NFR-6	Scalability	It is based on the number of users who maintaining the so\ware or a system according to its performance like workflow, increase or decrease in efficiency, response 1me etc. It scalability can be measured by maintenance, checking in for so\ware updates, fixing errors if occurred in server. By this a good quality of product is determined.
